DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 – 7 and 9 – 20 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by U.S. Patent No. 6,400,804 (Bilder).

With respect to claims 1 – 7, 9 – 11, 14 and 16 – 20 note Abstract and Figs. and Col. 2, lines 1 – 55. Note use of Internet at Col. 9, lines 33 – 44.

With respect to claim 12 and 13, note Col. 3, lines 45 – 55 and Col. 6, lines 6 – 22.

With respect to claim 15, note that such is inherent from the above rejections.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bilder in view of U.S. Patent No. 6,584,490 (Schuster et al.).

Though it is believed that the limitation of claim 8 is inherent in Bilder, Schuster et al. explicitly teach that switching to a different CODEC is old in the art (see Col. 10, lines 16 – 25 and Col. 18, line 11). It would have been obvious to one of ordinary skill to use such an ability as changing CODECs as taught by Schuster et al. into the Bilder device and method to make the device more compatible with other networks.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

U.S. Patent No. 6,556,670 (Horn) – note Figs. and Abstract;
U.S. Patent No. 6,526,041 (Shaffer et al.) – note Figs. and Abstract;
